

Erratum

Campbell LM, Anderson TJ, Parashchak MR, *et al.* A comparison of the efficacy of long-acting β_2 -agonists: efomoterol via Turbohaler[®] and salmeterol via pressurized metered dose inhaler or Accuhaler[®], in mild to moderate asthmatics. *Respir Med* 1999; 93(4): 236–244.

Please note that in paragraphs 2 and 6 of the Introduction (page 237), the units for efomoterol and salmeterol should be μg , not mg.

In the legend to Figure 4, the symbols for efomoterol and salmeterol were transposed. The correct legend appears below.

FIG. 4. Inhaler preferred by patients when given the choice of efomoterol Turbohaler[®] (■) or salmeterol pMDI (□) ($P=0.0168$).
